

Measurement Checklist

Hello,

Please read and complete the following tasks to help you prepare for your measurement:

- Make sure cabinets are level, square and secured to the wall or floor. (If you are getting new cabinets please make sure they are fully installed before requesting a measurement)
- Make sure sinks, faucets, cooktops and any other items to be mounted in the countertop are on the job site for when we come measure. (also that includes all cutout information including sink and faucet templates)
- Make sure all appliances are in place
- Make sure you have an adult over the age of 18 on site who can make decision and approve all countertop details
- Make sure all countertops are cleared of all clutter and small appliances to allow for accurate templating

Please sign below, confirming that you have read and completed the checklist above.

Signature: _____ **Date:** _____

Failure to complete all requirements by the time we are scheduled to measure, will result in an additional \$125 charge for a second measurement. If you are unsure about anything please call ahead of time so we can make sure you are fully prepared.

Thank you,

Granstone
